MEMORANDUM

TO: Members, Committee on Small Business, Subcommittee on Economic Growth, Tax, and Capital Access

FROM: Sharice Davids, Chairwoman

DATE: July 19, 2022

RE: Subcommittee Hearing: The SBA Office of International Trade and the STEP Program as Key Tools Recovery and Expansion

The Committee on Small Business, Subcommittee on Economic Growth, Tax, and Capital Access, will meet for a hearing entitled, “The SBA Office of International Trade and the STEP Program as Key Tools Recovery and Expansion.” The hearing is scheduled to begin at 10:00 A.M. on Tuesday, July 19, 2022, in Room 2360 of the Rayburn House Office Building, and virtually via the Zoom platform.

The hearing will review the Small Business Administration’s (SBA) State Trade Expansion Program (STEP). The Small Business Jobs Act of 2010 authorized the SBA to establish a three-year State Trade and Export Promotion pilot grant initiative to increase the number and value of small business exports. Later, through the Trade Facilitation and Trade Enforcement Act of 2015, the SBA was directed to formerly establish the State Trade Enhancement Program (STEP) to provide grants to states to increase the number of exporting small businesses, particularly in States with a small number of small businesses exporting or proposals that would assist rural, women-owned, and socially or economically disadvantaged small businesses. This hearing will allow Members to hear the states’ and small business perspective on STEP and its effectiveness in providing exporting opportunities for small businesses.

Witnesses

- Mary Waters, Deputy Commissioner, International Trade, Georgia Department of Economic Development, Atlanta, GA.
- William Spear, Manager, New Jersey Office of Export Promotion and Director, NJ STEP, Trenton, NJ.
- Luther Toops, CEO, Pyramid Foods, LLC, Shawnee, Kansas.
- Devan Walding, Vice President Sales, Radius, Kutztown, PA.
Background
Nearly 96 percent of consumers live outside the United States, with two-thirds of the world's purchasing power in foreign countries.1 Exporting is an opportunity for small businesses to expand sales and impact the global marketplace. Approximately 166,384 small businesses in the United States currently export, accounting for about 26 percent of all U.S. exports.2 These small businesses account for roughly $341 billion of $1.32 trillion in export sales and 96 percent of all exporters.3 However these small businesses make up only 3 percent of total small businesses with employees in the United States.4

Small firms often face unique challenges in exporting largely attributable to a complex and intimidating process, which they may not have the time or resources to learn and navigate. Other barriers include difficulty obtaining the working capital to fill foreign purchase orders, not knowing how to connect with foreign buyers, and lacking the expertise to understand other countries’ rules and regulations. Since small firms are essential to our economy and the majority of consumers live outside the U.S., more emphasis must be placed on the potential to expand the number of small businesses successfully exporting. Doing so is critical for long-term growth of small businesses and the U.S. economy overall. The SBA is just one of several federal agencies that assist in the promotion of small business exports and in export promotion more broadly.

Office of International Trade
Officially established as its own office within SBA in December of 2010, SBA’s Office of International Trade (OIT) is responsible for supporting small business international trade development.5 OIT works in cooperation with other federal agencies and public and private sector groups to encourage small business exports and provide small business export assistance.6 Specifically, OIT participates in the regional network of 21 U.S. Export Assistance Centers (managed by the Department of Commerce) and coordinates with SBA District Offices and service-provider partners.

SBA’s OIT assists with four areas of export promotion: (1) identifying small businesses interested in export promotion; (2) preparing small businesses to export; (3) connecting small businesses to export opportunities; and (4) supporting small businesses once they find export opportunities.7 The primary export program under OIT’s jurisdiction is the State Trade Expansion Program (STEP).

The State Trade Expansion Program

The Small Business Jobs Act of 2010 authorized the SBA to establish a three-year State Trade and Export Promotion pilot grant initiative. The program had two objectives: (1) increase the number of small businesses that export and (2) raise the value of existing small business exporters. The Associate Administrator of OIT is responsible for overseeing the program and awards matching funds to states and territories for participation in trade missions, international marketing efforts, workshops, export trade show exhibits, and other promotional activities.

The Trade Facilitation and Trade Enforcement Act of 2015 renamed the program the “State Trade Expansion Program (STEP),” and provided a $30 million authorization through fiscal year 2020. The Act allowed the Associate Administrator of OIT to give priority to STEP proposals from states that have a small number of small businesses that export or proposals that would assist rural, women-owned, and socially or economically disadvantaged small businesses.

STEP grants are available to all 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands. In most cases, the SBA provides 75 percent of total project costs and states provide 25 percent of the sum of the federal award and the recipient match amount. However, for the top three states in value of exports, as determined by the U.S. Census Bureau’s export data (California, Texas, and New York), the SBA provides 65 percent of total project costs, and these states provide 35 percent of the sum of the federal award and the recipient match amount.

STEP awards are for two years, a base year and an option year. The option year is at the SBA’s discretion but is routinely awarded on the basis of prior year performance and funding utilization. STEP grant amounts range from a minimum of $100,000 each in the base and option year to a maximum of $900,000 each in the base and option year. In addition, the 10 states “with the highest number of small business exporters”, as determined by the Department of Commerce’s latest data, may not receive more than 40 percent of available funds. For FY 2022 applications, these states were California, Florida, Georgia, Illinois, Michigan, New Jersey, New York, Ohio, Pennsylvania, and Texas.

As world travel came to a stop at the onset of the pandemic, Congress sought to provide relief to states participating in STEP. The CARES Act extended FY 2018 STEP grants for an additional year through September 2021, in order to allow States increased time and flexibility with the grant funds they had already received. Accordingly, in FY 2021, SBA awarded 32 continuation awards

and administered three sets of STEP grants from prior years—48 grants from FY 2020, 41 grants from FY 2019, and 47 grants from FY 2018.\textsuperscript{16} In FY 2021, SBA supported $832 million in export sales from STEP and assisted over 3,400 small businesses.\textsuperscript{17}

**STEP Reauthorization**

Last Congress, the House passed H.R. 6133, the STEP Improvement Act of 2020. The bill was introduced by former Representative Abby Finkenauer (D-Ia) and co-sponsored by former Representative Ross Spano (R-Fl). The bill would have reauthorized STEP for four fiscal years and created a standardized application process to address concerns that SBA’s STEP application period was variable and short, making it difficult for states to plan. Further, the bill increased grant spending flexibility by allowing states to revise their budget plans after the disbursement of funds provided that the states notify the Associate Administrator, and the change complies with allowable uses for grant funds. The bill would also have improved communication between the states and SBA through an annual survey of grantees. Lastly, the bill would have enhanced STEPs annual reporting requirements. The Committee plans to introduce similar legislation this Congress.

**Conclusion**

Exporting provides small businesses with many opportunities to grow their business, yet only three percent of America’s small businesses are exporting their products. STEP provides valuable assistance to help entrepreneurs market and sell their products overseas, which in turn has the potential to stimulate economic growth in the United States. It is important to ensure that the program is being used to its fullest potential. As Congress prepares to reauthorize STEP, it is important to discuss what improvements can be made either by the agency or Congress to improve the delivery of services and make it easy for small businesses to export.
